CHAPTER 29		**ORGANIC CHEMICALS** **Chapter Note:** Any good of this chapter that is the product of a chemical reaction shall be considered to be an originating good if the chemical reaction occurred in a Party. The "chemical reaction" rule may be applied to any good classified in this chapter if the product fails to satisfy the regional value content and change in tariff classification criteria provided for in the Product Specific Rule. Note: For the purposes of this Chapter a "chemical reaction" is a process (including a biochemical process) which results in a molecule with a new structure by breaking intramolecular bonds and by forming new intramolecular bonds, or by altering the spatial arrangement of the molecule. The following are not considered to be chemical reactions for the purposes of determining whether a product is an originating good: (a) dissolving in water or other solvents; (b) the elimination of solvents including solvent water; or (c) the addition or elimination of water of crystallization.
